Professional Summary

Seasoned software engineer with extensive experience designing and delivering high-impact mobile, web, and AI-driven solutions. Proven ability to streamline development cycles, optimize APIs for large-scale data, and democratize AI services for underserved communities via SMS and feature phones. Passionate about clean, scalable solutions.

Key Skills

- **Mobile & Frontend:** Flutter · Dart · Kotlin/Java · Jetpack Compose · React
 - **Backend & Data:** .NET 6 · Node.js · Firebase · PostgreSQL · REST/GraphQL
 - **AI & Data Science:** Python · Pandas · NumPy · Gemini AI · Web Scraping
 - **DevOps & Process:** Docker · GitHub Actions · CI/CD · Agile/Scrum
 - **Leadership & Impact:** Hackathon Winner · Technical Mentorship · Community Outreach
-

Professional Experience

Meta4tech, Kaduna, Nigeria

Software Engineer & Data Analyst · Jan 2024 – Present

- Led development of a community-driven case-logging platform with AI-powered summarization, dramatically reducing manual review effort and engaging hundreds of users.

- Architected and optimized a linguistic data API that serves millions of records with consistently low latency.
- Established robust CI/CD pipelines, ensuring reliable delivery and near-continuous uptime.

Software Engineer (Contract) · Jun 2023 – Jan 2024

- Built Python pipelines to ingest and analyze market data, generating actionable pricing insights for clients.
- Developed and maintained a real-time dictionary extraction service, enhancing lookup performance and reliability.

Mobile Developer (Intern) · Feb 2021 – Dec 2022

- Created a floating-window dictionary app with a vast lexical database, quickly earning a strong active user base.
- Launched a hierarchical note-taking application praised for its intuitive design and positive user feedback.

Eleven36, Kaduna, Nigeria

Mobile Developer · Apr 2025 – Jul 2025

- Delivered modular Flutter components that significantly accelerated feature rollouts for logistics and fintech solutions.
- Refactored legacy code, introduced best practices, and reduced defect rates, earning high client satisfaction.

Strategic Projects & Hackathons

- **AgriAsk** (Africa's Talking AgriTech Hackathon Winner): Developed an SMS-based AI advisory platform for farmers, rapidly adopted by agricultural communities.
- **AskAll**: Pioneered an SMS gateway to bring Gemini AI capabilities to feature-phone users across Africa, overcoming connectivity barriers.
- **vCase** (Grand Winner, vCon TadHack): Led development of a case-management solution that secured top honors at a pan-African hackathon.

- **WiPy Web App:** Built a peer-to-peer local file-sharing solution that greatly improved in-office data transfers.
 - **TadHack Champion:** Delivered a secure, TNID-powered solution in a major security-focused hackathon.
-

Education

B.Sc. Computer Science, Kaduna State University · Nov 2019

Community & Advocacy

- Mentor for regular workshops on Flutter, Python, and Agile best practices throughout Northern Nigeria.
 - Actively sharing progress and perspectives on community-based digital solutions.
 - Advocate for offline-first AI, developing SMS-based solutions to bridge the digital divide.
-

Certifications

- Flutter Certified Application Developer
 - Jovian Certified Data Analyst
