Professional Summary

Software engineer with 6+ years of experience building mobile and web applications that solve real problems for underserved communities. I specialize in creating solutions accessible via SMS, feature phones and smart devices, bringing modern technology to areas with limited internet connectivity. Strong track record in mobile development (Flutter/Android), backend systems, and data analysis.

Technical Skills

Mobile Development: Flutter, Dart, Kotlin, Java, Jetpack Compose

Frontend: React, responsive design

Backend: .NET 6, Node.js, Firebase, PostgreSQL, REST APIs

Data & AI: Python, Pandas, NumPy, Gemini AI integration, web scraping

Tools & DevOps: Docker, GitHub Actions, CI/CD pipelines, Git

Methodologies: Agile/Scrum, code reviews, technical documentation

Professional Experience

CASE, Kaduna Nigeria

Software Engineer & Data Analyst | *Jul 2025 — Present*

- Developed the CASE platform's case-logging and petition features, enabling community members to submit, browse, and track reported incidents while preserving submitter anonymity where requested.
- Designed and implemented the Organization Module to onboard NGOs and local groups so they can register, classify cases by specialization, and respond to community reports.
- Collaborated with a four-person cross-functional team (developer, designer, resource lead) to shape the MVP, produce pitch materials, and stabilize the demo after recent code changes.

Eleven36, Kaduna, Nigeria

Mobile Developer | *Apr 2025 — Jul 2025*

- Built reusable Flutter components for logistics and fintech clients, reducing new feature development time by 30%
- Refactored legacy codebase, improving code coverage from 45% to 75% and reducing crash rate by 50%
- Introduced Flutter best practices and widget testing, mentoring 2 junior developers on the team

Software Engineer, Meta4Tech | *Jun 2023 — Jan 2024*

- Developed Python data pipelines to scrape and analyze market pricing data from 50+ sources, providing weekly insights to business clients
- Built a real-time dictionary API with caching layer, reducing average lookup time from 800ms to 120ms
- Automated data collection processes, saving the team approximately 15 hours per week of manual

work

Mobile Developer (Intern) | *Feb 2021 — Dec 2022*

- Created a floating-window dictionary app for Android with 1M+ words database, reaching 500+ active users within first 3 months
- Developed a hierarchical note-taking app with offline-first architecture, earning 4.2+ star rating from early users
- Collaborated with senior developers on code architecture and learned Flutter framework fundamentals

Notable Projects & Achievements

AgriAsk — *Winner, Africa's Talking AgriTech Hackathon*

SMS-based AI agricultural advisory platform serving farmers in rural Nigeria. Provides instant crop advice, weather updates, and market prices via basic feature phones.

AskAll — *Personal Project*

SMS gateway enabling Gemini AI access for feature phone users across Africa. Bridges the digital divide by making AI accessible without internet connectivity.

vCase — *Grand Winner, vCon TadHack*

Case management solution for people reaching out to support organizations. Centralizes all communication from multiple communication channels into one platform, improving context for communication.

WiPy — *Open Source*

Peer-to-peer local file sharing web app. Enables office teams to transfer files up to 500MB without internet, using local network.

TadHack Security Challenge — *Winner*

Developed authentication solution using Trusted Network Identity (TNID) protocol. Completed security audit with zero critical vulnerabilities.

Education

B.Sc. Computer Science

Kaduna State University | *Graduated Nov 2024*

Community Involvement

- **Technical Mentor** — Conduct monthly workshops on Flutter and Python for developers in Northern Nigeria tech communities
 - **Offline-First Advocate** — Speaking at local tech meetups about building accessible solutions for low-connectivity areas
 - **Open Source Contributor** — Active on GitHub, contributing to Flutter packages and documentation
-

Certifications

- Flutter Certified Software Engineer
 - Jovian Certified Data Analyst
-
